

GS1 US Data Hub Q4 2024 RELEASE NOTES

GS1 US Data Hub allows you to identify, create, manage, share, and verify product and location data through one convenient platform. The Data Hub Q4 2024 release delivers several important enhancements across the GS1 US Data Hub. A significant change to the barcode interface aims to streamline the ability for users to view and download their barcodes, while some infrequently used functions have been removed from the tool.

GS1 US Data Hub

- All new Alerts & Notification Center for Product, Location, and Company

GS1 US Data Hub | Product

- Barcodes now appear directly on the Product Detail page. (UPC-A, ITF-14, EAN-13)
 - GS1-128, GS1 Datamatrix and GS1 Databar barcode types have been removed
 - Minimum/Maximum size, export definition, print barcodes option removed
- .EPS file (Vector format) support in addition to current .PNG format.
- The redesigned Product Detail page is now responsive to changes in window size and features a cleaner layout with enhanced share settings and hierarchy views.
- GDSN Harvester functionality is now available without “GS1 US Datahub” Enterprise Edition”.
 - Sync your GTINs from your data pool to GS1 US Data Hub quickly and easily, receive a data evaluation report and see your products in Verified by GS1 – at no additional cost.
